SIGNAL PROCESSING

Cumulative contents of Volume 46

Volume 46, No. 1, September 1995

Papers

B.-G. Lee, K.Y. Lee and S. Ann
An EM-based approach for parameter enhancement with an application to speech signals 1
M. Rupp
Normalization and convergence of gradient-based algorithms for adaptive IIR filters 15
B. Sin and J.H. Kim
Nonstationary hidden Markov model 31
G.-O. Glentis and N. Kalouptsidis
A highly modular adaptive lattice algorithm for multichannel least squares filtering 47
J.J. Rajan and P.J.W. Rayner
Unsupervised time series classification 57
W.A. Gardner and L. Paura
Identification of polyperiodic nonlinear systems 75
D.A. Linebarger, R.D. DeGroat, E.M. Dowling, P. Stoica and G.L. Fudge
Incorporating a priori information into MUSIC-algorithms and analysis 85
E. Reusens
Joint optimization of representation model and frame segmentation for generic video compression..... 105
H.M. Ozaktas and O. Aytür
Fractional Fourier domains 119

Announcement and call for papers..... 125

Volume 46, No. 2, October 1995

Papers

A. Potchinkov and R. Reemtsen
The design of FIR filters in the complex plane by convex optimization 127
X. Liu and L.T. Bruton
Improved LDI digital filters derived from analog LC ladder filters 147
V. Cappellini, P. Emiliani, A. Mecocci and A. Montalto
An expert system for digital filter design 159
J.A. Stark and W.J. Fitzgerald
Parameter-based hypothesis tests for model selection 169
W. Luo and S.A. Billings
Adaptive model selection and estimation for nonlinear systems using a sliding data window 179
O. Besson and P. Stoica
Statistical analysis of the least-squares autoregressive frequency estimator for random-amplitude sinusoidal signals 203

Elsevier Science B.V.

A.K. Nandi and E.E. Azzouz
Automatic analogue modulation recognition 211
Y. Xiao and Y. Tadokoro
LMS-based notch filter for the estimation of sinusoidal signals in noise 223
A.R. Chaudhuri, B. Chanda and B.B. Chaudhuri
Detection of occluded circular objects by morphological operators 233
C.C. Ko and H. Liu
Estimation of powers of uncorrelated sources in linear arrays 243

Fast communication

M. Popović and D. Šević
Realization of an in-place unscrambler for prime factor algorithm 249

Announcement and call for papers 253

Volume 46, No. 3, October 1995

Papers

K.C. Ho and P.C. Ching
Split filter structures for LMS adaptive filtering 255
C.G. Puntonet, A. Prieto, C. Jutten, M. Rodríguez-Alvarez and J. Ortega
Separation of sources: A geometry-based procedure for reconstruction of n-valued signals 267
S.V. Narasimhan, G.R. Reddy, E.I. Plotkin and M.N.S. Swamy
Group delay based magnitude square coherence estimation by an ARMA model 285
A. Høst-Madsen and C. Caspersen
Spectral estimation for random sampling using interpolation 297
S.S. Goh and I.G.H. Ong
Reconstruction of bandlimited signals from irregular samples 315
A.S. Ashur, M.K. Ibrahim and A. Aggoun
Novel RNS structures for the moduli set $(2^n - 1, 2^n, 2^n + 1)$ and their application to digital filter implementation 331
A. Bijaoui and F. Rué
A multiscale vision model adapted to the astronomical images 345
D. Kundu and A. Mitra
Estimating the parameters of exponentially damped/undamped sinusoids in noise: A non-iterative approach 363

Fast communication

I.E.G. Richardson and M.J. Riley
Improving the error tolerance of MPEG video by varying slice size 369

Announcements and calls for papers 373

Author index of Volume 46 377
